Carousel Bin System

Elephants Foot's Carousel Bin System is a versatile and advanced waste management solution, engineered to automate bin handling and streamline waste collection in multi-storey and multi-level developments.

Its durable electromechanical design ensures seamless operation by efficiently rotating bins, automatically replacing full ones with empty ones, and providing continuous, hassle-free waste management.

Efficient Waste Management with the 240L Carousel Bin System

The 240L Carousel Bin System by Elephants Foot is designed for facilities with moderate waste output.

This robust system automates the handling of 240-litre bins, ensuring efficient and uninterrupted waste management.

Capable of accommodating up to five bins, the system uses a rotating mechanism to replace full bins with empty ones seamlessly.

Optional compaction units can be integrated to compress waste, allowing for increased capacity and reducing collection frequency. With its compact design and automated operations, the 240L Carousel Bin System is perfect for smaller waste rooms and environments.

Available with or without compaction unit, our Carousels come suited for 240L, 660L and 1100L mobile garbage bins.

See reverse side for more information.

Key Benefits

The 240L Carousel Bin System offers a range of features designed to enhance waste management efficiency, safety, and usability in smaller developments.

KEY BENEFITS INCLUDE:

Improved Waste Handling: Automated bin rotation reduces manual effort, ensuring seamless waste collection.

Enhanced Safety: Limits manual bin handling, ensuring safety for residents, caretakers, and waste collectors.

Capacity Management: Optional compaction units handle larger volumes of waste, minimising collection frequency.

Space Optimisation: The compact, rotating design maximises available space, making it ideal for tight areas.

Simple Operation: User-friendly controls allow easy operation, with automatic system control and manual override.

Cost-Effective Maintenance: Low servicing and maintenance costs.

Quiet Operation: Engineered for efficient, low-noise performance.

Flexible Design: Accommodates low ceiling clearances and offers retrofit options for existing chute systems.

Regulatory Compliance: Fully meets relevant Building Codes and Standards.

Warranty Assurance: Backed by a standard 12-month warranty for reliability.

Long-lasting Durability: Designed for long-term use, ensuring durability and reliability over time.

CAROUSEL BIN SYSTEM

240 LITRE

| No. of Bins | Reference (mm) | | | |
|-------------|----------------|-----|------|------|
| | A | B | C | D |
| 4 | 750 | 500 | 2020 | 2200 |
| 5 | 900 | 600 | 2460 | 2600 |

Available with or without compaction unit, our standard 240 litre bin Carousel Bin System is available in 4 or 5 bin options.
