HORIZONTAL BALER EQUIPMENT

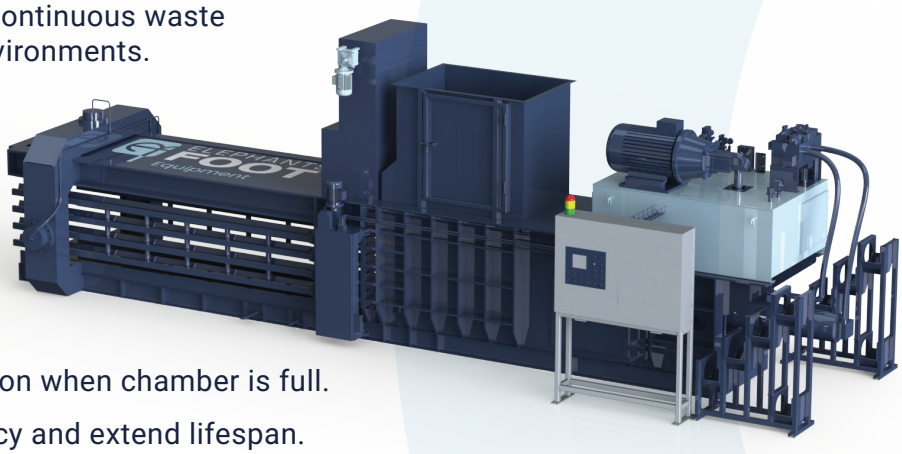
EF 400 Automatic

The EF 400 AUTO is a compact automatic baler with cyclone suction, designed for efficient collection and compression of paper trims, cardboard scraps, and lightweight packaging waste.

Its automated operation, fast cycle time, and space-saving design make it ideal for continuous waste handling across diverse production environments.



FEATURES

- Photoelectric sensor triggers operation when chamber is full.
- Double-cutting blades boost efficiency and extend lifespan.
- Automatic tying system for quick, low-maintenance cleanup.
- Differential hydraulics reduce cycle time and energy use.
- Optional cyclone unit for direct suction of trims and scraps.
- Durable construction (7-ton weight).

- Anti-slide design for uniform bales.
- Photoelectric activation for hands-free operation.
- 15 kW motor with efficient air/water cooling.
- 40-tonnes compaction pressure for dense bales.
- Automated tying system reduces labour.
- Durable construction (7-ton weight).

SPECIFICATIONS

Baler Dimensions (WxHxD)	5950x3200x2500 mm
Chamber Size (HxDxW)	800x720x1600 mm
Bale Size (LxW)	720x800 mm
Bale Weight	350–450 kg/m³
Cycle Time	20 sec (unload)
Throughput	1.5–3 tons/hour
Power Supply	415V, 3-phase D curve breaker
Motor	15 kW
Hydraulic Pressure	40 Tonnes
