VERTICAL BALER EQUIPMENT

EF 500

A high-capacity vertical baler designed for bulk waste handling in commercial and industrial settings. It produces resale-ready bales up to 500 kg and features a wide feed opening for loading large materials without folding.

With automatic cycle, visual indicators, and robust construction, it's built for performance and reliability.

FEATURES

- Wide feed opening for bulkier material without pre-folding.
- Slide-up door for easy loading and minimal operating space.
- Visual bale full indicator and automatic cycle for convenience.
- Press plate support reduces downtime and wear.
- IP55 rated for outdoor or semi-exposed locations.

Suitable for medium quantities of plastic and cardboard.

Two hand safety for bale ejection.

Designed, built and fitted internally ensuring the highest standard.

The robust construction ensures a long life span.

SPECIFICATIONS
