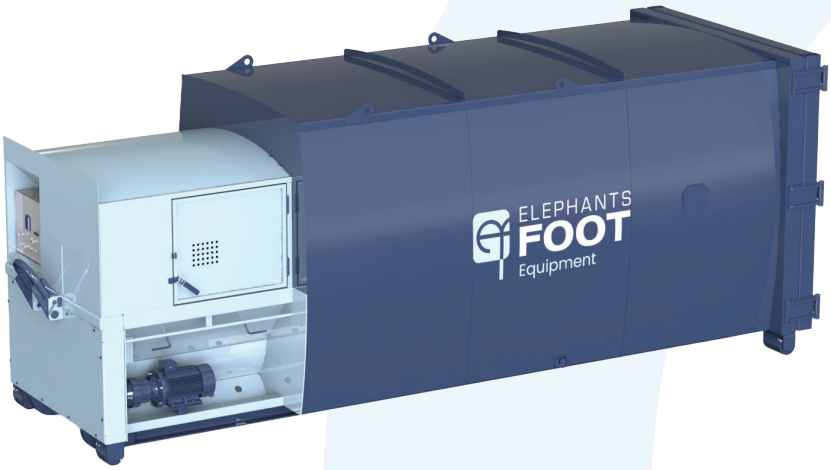
ELEPHANTS FOOT GROUP

Integrated Auger Compactor

A mobile, high-capacity compaction system designed for wet and dry waste streams.

Combining a sealed auger unit with a bulk bin, it offers plug-and-play operation, jam-free performance, and efficient waste handling across multiple work sites , no installation required.



FEATURES

- Sealed chamber prevents leaks and odours.
- Handles both wet and dry waste streams.
- Auto-reversing auger clears jams automatically.
- Integrated bulk bin with 165mm rollers for mobility.
- 11KW motor with 4mm steel construction for durability.

Mobile unit moves between work.

Powerful 11kW motor crushes all waste.

Plug in and start compacting immediately.

Handles both wet and dry waste.

Automatically reverses to clear jams.

SPECIFICATIONS

Dimensions HxDxW	From 2200x4200x1800*
Construction	4mm steel walls
Motor	11 kW
Power	415V, 32A 3-phase
Mobility	165mm rollers
Capacity	10-25m³

*Size increases proportionally with larger capacities.
