Single Bin Compactor

A compact, plug-and-play waste compactor designed to reduce bin volume by up to 2:1.

Available in 240, 660, and 1100-litre models, it's ideal for retail, hospitality, healthcare, and industrial sites looking to lower disposal costs without changing existing waste handling processes.

FEATURES

- Fully enclosed bin for safe compaction.
- Available in 240L, 660L, and 1100L models.
- Durable steel construction for long-term use.
- 240V single-phase power with fast cycle times.
- Reduces bin volume and collection frequency.

67% less space with 2:1 compaction.

Easy integration with existing waste systems.

Fewer collections saves up to 40%.

CORE MODELS

Dimensions DxWxH	From 950 × 1500 × 2400*
Power	240V, 10A with D curve breaker
Cycle	30 sec
Weight	234 kg
Waste	Cardboard and general waste

*Size increases proportionally with larger capacities.
