ELEPHANTS FOOT GROUP

Stationary Auger

A high-efficiency compaction system designed for large volumes of dry and wet waste such as cardboard and paper.

Ideal for retail, logistics, and industrial sites, it delivers 5:1 compaction with minimal maintenance and a compact footprint for easy site integration.

FEATURES

- Ram guide design keeps the platen level, even with uneven material feed.
- Fitted with durable NOK seals from Japan for extended life.
- A.M.C oil pipe joints from Japan prevent leaks.
- Large size feed opening and baling chamber for easier loading.
- Packaging slot on the door for convenience of observation and packing.
- Double chamber for different materials with higher efficiency.

- 5:1 compaction reduces volume.
- Built-in shredding for bulky items.
- Fits anywhere - compact footprint.
- Hands-free automatic operation.

SPECIFICATIONS

Bin Capacity	10-40 m^3
Auger Diameter	900mm
Auger Speed	8 RPM
Motor	10 kW
Power	415V, 3-phase 32A D curve Breaker
System Weight	1750 kg
